integrify

Making Life Easier with a Table Maintenance Process

Integrify User Conference 2023

Agenda

- Why use a table maintenance workflow?
- Connecting external DBs
- Workflow configuration

Make your organization more efficient and productive.

integrify

Workflows are data-driven in every industry

- List of vendors for invoice approval

- Inventory in a store/warehouse

- Residents/addresses in a county for deed transfers/property assessment

- Current employees for HR tracking and performance reviews

- Donors to a charitable organization for gift officers to follow up with and maintain relationships

integrify

Benefits of table maintenance workflows

- Standardize data format

- Instant updates to data that affects other processes

- Empower end users to maintain accurate data without need for SQL knowledge

Make your organization more efficient and productive.
